Project Finalised	Dataset Found	Coding Begins	Training & Testing	Final Presentation
21 Sept 2022	Oct 2022	Oct-Nov 2022	Nov 2022	1 Dec 2022
Out of three Mini Project ideas, this one was chosen by our guide and team members.	On Kaggle, we found and selected a publicly available dataset of Chest X-Ray images.	Using what we learnt from Kaggle, research papers, etc. we began working on the Python code.	Once the code was completed, we trained the algorithm using our dataset and tested it with new X-Rays.	The project is presented to our guide in its final state, with hope for expansion in future semesters.
